EDUCATION

CMR College of Engineering & Technology <i>Bachelor of Technology in Computer Science and Engineering (Data Science) – CGPA: 7.48/10</i>	Hyderabad, India 2024 – 2028
Sri Chaitanya Junior College <i>Intermediate, Board of Intermediate Education (Score: 851/1000)</i>	Telangana, India 2022 – 2024
Sri Chaitanya School <i>Secondary School Certificate (CGPA: 8.8/10.0)</i>	Telangana, India 2020

TECHNICAL SKILLS & CERTIFICATIONS

Languages & Frameworks: C, Java, Python, SQL (MySQL)
Data Structures & Concepts: Data Structures using C, Algorithmic Problem Solving, DBMS, Pandas, NumPy
Developer & Hardware Tools: VS Code, Arduino IDE, Git, GitHub, AutoCAD (Basic), $\text{\LaTeX}$
Productivity & Media Tools: Microsoft Office Suite, Google Workspace
Certifications: Cisco Networking Basics Certification, Cisco Intro to Data Science, Deloitte Data Analytics, Intro to Modern AI
Spoken Languages: English (Professional), Telugu (Native), Hindi (Professional Working), Kannada (Basic)

ENGINEERING PROJECTS

SecureNodeX – Security Framework | *Cybersecurity, System Architecture, Network Protocols*

- Engineered a cybersecurity prototype during a 36-hour national hackathon to reinforce application-level defense mechanisms.
- Designed secure system communication protocols to mitigate network vulnerability surfaces and prevent unauthorized access.

Safeon – Smart IoT Safety Wearable Locket | *ESP32-S3, Camera Module, Wi-Fi, Embedded C*

- Developed an IoT-based wearable safety unit utilizing an ESP32-S3 microcontroller integrated with a dedicated camera module.
- Configured automated emergency triggers to instantly capture incident images and transmit live location telemetry to registered contacts.

Arogya Drishti – Secure Hospital Management System | *Java, MySQL, Database Management*

- Designed a centralized relational database architecture to streamline patient records, clinical data, and administrative workflows.
- Enforced relational integrity constraints and access boundaries to safeguard sensitive medical history logs.

Smart Charger – Automated Battery Health & Power Optimization Engine | *Arduino IDE, Power Sensors*

- Engineered an intelligent charging control unit to preserve battery lifespan via dynamic automated power regulation.
- Implemented overcharge detection and thermal safety cutoffs to optimize overall electrical energy efficiency.

HACKATHONS & STRATEGIC ACHIEVEMENTS

- Top 40 National Finalist – Samsung Solve for Tomorrow 2026:** Selected among the top 40 teams across India (Team Mistify) for designing and pitching an innovative, tech-driven social prototype.
- 1st Place Winner – CodeStorm 2K26 National Hackathon:** Ranked 1st overall among 105+ competing teams across 53 engineering colleges for building a rapid hardware/software engineering prototype under 36 hours.
- Competitive Hackathon Participation:** Actively competed in over 10+ hackathons, project expos, and technical problem-solving competitions.
